

PRODUCT SHEET

EROAD Share

EROAD Share makes it easy to share vehicle and fleet information securely and easily with businesses in your supply chain, improving safety compliance and productivity.

Protect your valuable mobile assets

When you work with contractors or other businesses in your supply chain, you don't always have the same visibility of their fleets as you have of your own. This can affect productivity and your ability to ensure the safety of all drivers working for you.

EROAD Share lets you share information easily, effectively and securely. It simplifies health and safety compliance by showing you not only the location of vehicles, but also how they are being driven. You control which vehicles are shared, for what period, and the driver behaviour reports they appear in.

Your business, and those you work with, can coordinate resources, and simplify dispatch and job management. Sharing of data and improved visibility of your operations helps you deliver high-quality service to your customers.

Visibility of your sub-contractors' vehicles (equipped with EROAD units) means you can ensure the same high standards you expect from your own drivers, and better meet your Chain of Responsibility obligations.

KEY BENEFITS

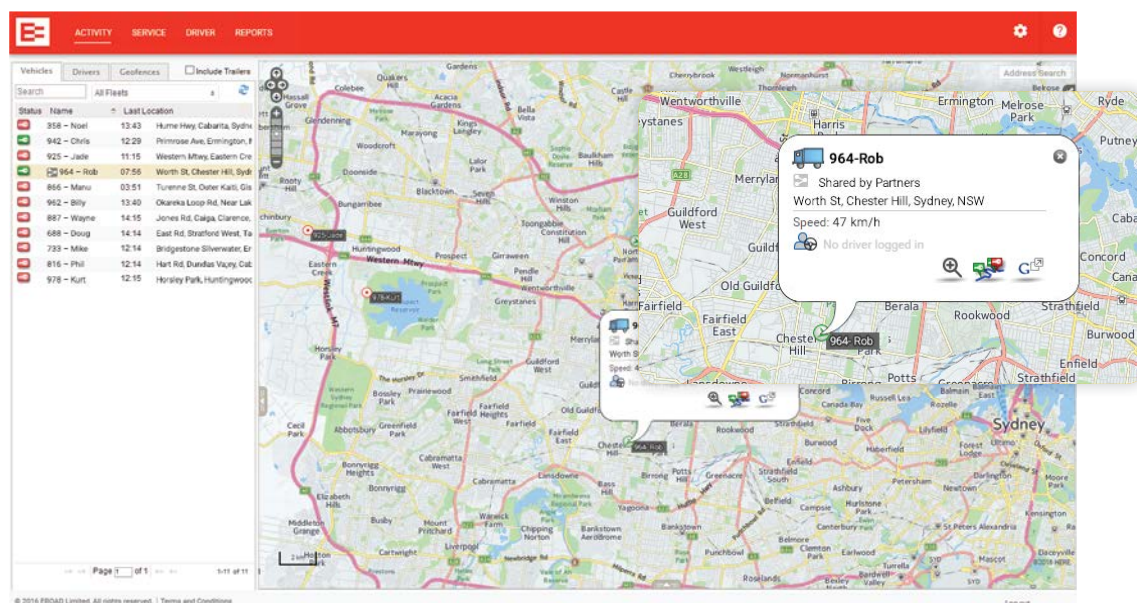

Minimise risk Complete display of own and shared vehicle information on the same digital map helps minimise workplace risk

Improve dispatch Share live and historical daily activity history for your vehicle fleets to better manage dispatch and provide proof of job completion

Coordinate resources Sub-contractor and contractor vehicles can be ranked against each other to improve fleet management

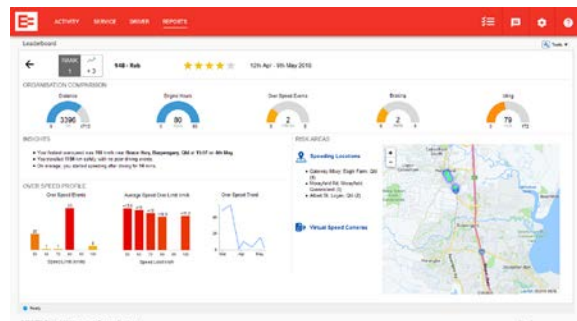

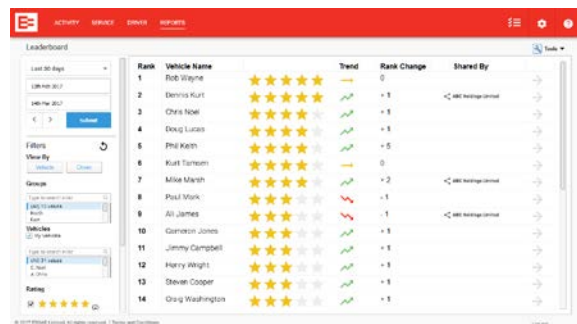

Ensure safety Enable monitoring of driving behaviour by including shared vehicle data in Over Speed Dashboard, Leaderboard and Driver Insight reports

Simplify job management Move shared vehicles into your own fleet for enhanced job management

KEY FEATURES

- › Complete display of own and shared vehicle information on the same digital map helps minimise workplace risk
- › Share live and historical daily activity history for your vehicle fleets to better manage dispatch and provide proof of job completion
- › Sub-contractor and contractor vehicles can be ranked against each other to improve fleet management
- › Enable monitoring of driving behaviour by including shared vehicle data in Over Speed Dashboard, Leaderboard and Driver Insight reports
- › Move shared vehicles into your own fleet for enhanced job management
